Require: Civil / Environmental / Geotechnical Engineering Graduates
Fulltime and Summer Positions

Terraprobe offers a comprehensive range of specialist consulting services in the fields
of geotechnical engineering, environmental science and engineering, hydrogeology, and
construction materials engineering. We are Canadian owned and have offices in
Brampton (head office), Barrie, Stoney Creek and Sudbury, Ontario.

We are seeking Civil Engineering and Geological Engineering (Geotechnical/Geo-
Environmental) graduates and summer students for our BRAMPTON and BARRIE
offices. We have two types of positions currently available

Geotechnical / Geo-Environmental (site development) – Fulltime only

- Borehole drilling and sampling for geotechnical, environmental and
  hydrogeological investigations
- Office work including organization, management and plotting of data

Geotechnical Field Review (site construction) – EITs and Summer Students

- Field concrete, asphalt, and compaction testing at construction sites
- Compaction control and surveying for earth fill projects
- Shoring and retaining wall monitoring
- Assist in our soils laboratory when required (testing includes: sieve analysis,
  hydrometer analysis, concrete compressive strength testing, water contents,
  soil sample preparation)

A vehicle is required for these positions. The positions involves outside work in a
variety of weather conditions. Occasional out of town travel and overnight stays may be
required.

Compensation will include:
- Salary (hourly basis)
- Compensation for vehicle expense, cell phone, and travel
